Buildings Program  
and *Pediment*  
Gift of Juli and Jon Ellis,  
Class of 1985  
Collection:  
Art on Campus Collection,  
University Museums,  
Iowa State University

*Pediment*

### About the Works of Art

***Dikhotomia***: Both sculptural works are welded bronze and set on stone columns. Work "A" has a round bronze base that extends to form rising "flame or leaves" of grass. Work "B" also has a round base extended with vertical bars of bronze held together by three bronze bands placed at equal distance; the top is stylized bronze and overall the piece is cylindrical. *Dikhotomia* represents a dialogue between the horticulture and agriculture.

**University Museums/Art on Campus Program  
Iowa State University Ames, Iowa**

**Pediment:** A wood "pagoda style" canopy extends across the entry to the rose garden. Side support columns are 8' and are made of stone. A cedar wood trellis and bronze roses form the mid section of the canopy. The bronze finial is a 2' high vertical bronze rod with bronze ball midway up. Pediment references the architecture and landscape of the rural Midwest. The endless grid of our roads and fields as laid out on the Jeffersonian grid plan become a trellis, with a rose added to denote the entrance into the rose garden.

## About the Artist

1988 - Present      Associate Professor, Department of the Arts,  
University of Northern Iowa, Cedar Falls, Iowa

## Selected Commissions and Collections

Dallas Area Rapid Transit Authority, Cedars Light rail Station, Dallas, Texas
